

Quality Control Laboratory Technician

Full-time | Day Shift |  Montreal, Canada

DATE POSTED: 15th Jul 2020

DEPARTMENT: Laboratory

SUPERVISOR:

About the Lavergne

At Lavergne, we believe that there is enough plastic on earth to meet our future needs without ever creating new virgin plastic.

We are a Canadian company located in Anjou, in operation since 1986, and we have become the world leader in the production of sustainable engineering resin made from recycled plastic. Thanks to our unique know-how in polymer chemistry, our R&D experts and our ultra-modern facilities located around the world, we are able to offer specialized products and services adapted to the needs of major customers worldwide, in fields such as the automotive industry, electronics, as well as household appliances and furniture. We work in partnership with global leaders such as HP, Keurig, Dyson and others.

If you want to help protect the planet and be part of a winning team in a growing market, join us.

Overview of the Position

Under the supervision of the laboratory management, the laboratory technician is responsible for the conduct of various analytical tests. Work in the laboratory involves respect for ethics and standards (TS 16949 and ISO 17025).
